2. Business combinations – intra-group adjustments
3. Business combinations – fair value adjustments
4. Business combinations – associates and joint arrangements
5. Complete disposal of shares in subsidiaries

## Exam Question pattern

**Question one** will involve the preparation of one or more of the consolidated financial statements that are examinable within the syllabus. This question will often include issues that will need to be addressed prior to performing the consolidation procedures. Generally, these issues will relate to the financial statements of the parent prior to their consolidation.

**Question two** will often be related to a scenario in which questions arise regarding the appropriate accounting treatment and/or disclosure of a range of issues. In this question candidates may be asked to comment on management's chosen accounting treatment and determine a more appropriate one, based on circumstances described in the question.

**Question three** will usually focus more specifically on the requirements of one specific IFRS. This question will typically contain a mixture of explanation of the principles underpinning the standard and practical application of those principles.

**Question four** will usually consist of a scenario in which the candidate is given a series of queries from a superior relating to the financial statements. The requirement will usually be to answer each query. The queries will normally be independent of each other. It will be rare for the queries in question four to require a numerical answer.
